

⚠️ WHAT TO DO IN CASE OF AN EMERGENCY IF SOMEONE ASKS YOU WHAT A MICROCOMB IS ⚠️

Don't panic

Don't run away

Stay calm

You could say...

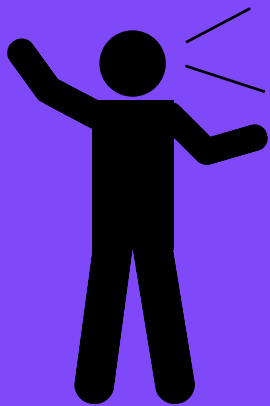

A. It's the world's most precise measurement tool. It uses light and can be used to measure position, frequency and time. 😊

or

B. It's a rainbow laser! 🌈

or

C. It's a chip-based photonic device that can generate up to millions of precise, evenly spaced light frequencies. 😎

If someone asks a follow-up question

Now you've mastered the conversation!
